River, Space, Design Martin Prominski, Antje Stokman, Daniel Stimberg, Susanne Zeller, 2012 River. Space. Design is a systematically organised reference book for the design and planning of river spaces. Urban river landscapes need to unite a broad range of requirements - most notably flood control, ecological considerations and open space design - often within tight space constraints. Taking a process-oriented approach, this book offers concrete guidelines for sustainable long-term interventions. Arranged in two volumes, this book contains a comparative analysis of more than 50 successful projects alongside rivers and streams in Europe, and dissects them into their individual design elements. The result is a catalogue of effective design strategies and tools that provides readers with an attractive and inspiring overview of the broad and varied spectrum of design possibilities for river spaces. Each project is illustrated with photographs taken especially for the book and each principle is illustrated with explanatory diagrams. The book's interdisciplinary structure is of interest to landscape architects, architects, engineers, urban planners and hydrologists alike.

River.Space.Design Martin Prominski, Antje Stokman, Daniel Stimberg, Hinnerk Voermanek, Susanne Zeller, Katarina Bajc, Nengshi Zheng, 2023-03-20 Urban riverbanks are attractive locations and highly prized recreational environments. However, they must meet the requirements of flood control, open space design and ecology at the same time, often a challenging task for the designer in very confined spaces. The book, the result of a study lasting several years, subjects more than 60 exemplary projects to a comparative analysis. The result is a systematic catalogue of strategies and innovative design tools. The designer and planner thus obtains an overview of the range of design possibilities. Eight new case studies from China, Italy, New Zealand, the Netherlands, Germany and Switzerland were selected and added for the enlarged edition of this reference work on riverbank design.

River.Space.Design Martin Prominski, Antje Stokman, Daniel Stimberg, Hinnerk Voermanek, Susanne Zeller, 2012-12-13 Urban riverbanks are attractive locations and highly prized recreational environments. The designs of urban river landscapes must fulfill a broad range of requirements: flood control, open space design, and ecology are as a rule the three dominant themes, and they must often be reconciled within a very restricted space. The river must be understood as a process: governed by changing water levels, shifting seasons, erosion, and sedimentation, the river environment is not a static entity but constantly changing—the design must be flexible and take this into account. This book is the product of a multi-year

study that subjected more than fifty Western European projects to a comparative analysis. The result is a systematic catalog of effective strategies and innovative design elements. First, designers and planners are given an overview of the broad and varied spectrum of design possibilities. The book's process-oriented approach is especially helpful where the focus is on long-term, sustainable measures. The publication consists of two linked volumes that enable the reader to consult the systematic catalog and the case study section side by side. The easy-to-navigate structure and an extensive glossary provide further guidance, while the work's highly distinctive design makes it visually appealing as well and invites the reader to leaf through and explore it.

River.Space.Design Martin Prominski,Antje Stokman,Daniel Stimberg,Hinnerk Voermanek,Susanne Zeller,Katarina Bajc,2017-05-22 Urban riverbanks are attractive locations and highly prized recreational environments. However, they must meet the requirements of flood control, open space design and ecology at the same time, often a challenging task for the designer. This book is the product of extensive research that identified some 60 best-practice examples and subjected them to a comparative analysis. The result is a systematic catalog of effective strategies and innovative design tools that provides readers with an inspiring overview of the broad spectrum of design possibilities for river spaces. Each project is illustrated with photographs taken especially for the book and each design strategy and tool is explained by diagrams. This revised edition introduces ten new case studies chiefly from North America.

Room for the River ,2017 The aim of the 'Room for the River' Programme was to provide more space for the major rivers in the Netherlands as a way of managing the higher water levels in the delta area. In over 30 locations measures were devised and implemented to allow the rivers to flood safely. Landscape architects and engineers worked together to design these measures in such a way that they also improved the quality of the landscape. This richly illustrated book showcases the results of all the projects, while the background and commentary texts illuminate this exemplary and impressive method of how the Dutch deal with climate change and landscape development.

Cities & Rivers Iñaki Alday,2024-04-29 A selection of architecture, landscape and urbanism works from aldayjover | architecture and landscape, an office based in Barcelona, Spain and Virginia in the United States. A collection of projects -- designed from their local and territorial DNA -- that respond in new ways to the global socio-ecological crisis in which we have been engaged with since the beginning of the 21st century. Featured works include public spaces, architecture and urban studies that incorporate natural dynamics and that also emphasize -- recovering in some cases -- legal access among all citizens and equal access to the city and its opportunities. The works presented are particularly renowned given their leadership role in a new approach to the relationship between cities and rivers, in which natural dynamics become part of the

public space, eliminating the effect of “catastrophe”.

A River Transformed Timothy Auger,2015 Discover how the Singapore government rehabilitated the Singapore River and created Marina Bay, transforming both into lifestyle/commercial settings.

River restoration: a strategic approach to planning and management Speed, Robert, Tickner, David, Naiman, Robert, Lei Gang, Sayers, Paul, Wei Yu, Li Yuanyuan, Huang Houjian, Cao Jianting, Yu Lili, Zhao Zhongnan, 2016-09-19

Constructing Singapore Public Space Limin Hee, 2016-09-21 This book presents possible alternatives and interpretations to the well established notion in the mostly western discourse on public space. The discourse on public space as understood in the democratic-rationalist tradition, when applied to the Singaporean public space, would offer much criticism but would not be adequate in identifying alternative processes that allow for transformative potentials in public space. Thus said, the objectives of this book are: 1. To develop a conceptual frame of reference to construct the discourse on Singapore public space 2. To form a preliminary model of Singapore public space through analyzing case studies 3. To understand the modes, methods of production and representation of these public spaces within the rapidly changing urban context 4. To situate these constructions of public space and its possible trajectories within the larger discourse on public space, and to examine the viability of such a construction and interpretive model of public space

Yamuna River Project Iñaki Alday, Pankaj Vir Gupta, 2021-04-15 This publication presents the results of more than five consecutive years of focused research initiatives and designs from The University of Virginia School of Architecture towards the revitalization of New Delhi, India’s water bodies. In collaboration with the Delhi Jal Board, The University of Virginia’s Yamuna River Project is an inter-disciplinary research program, proposing to revitalize the ecology of the Yamuna River in Delhi and creating vital urban links with the Yamuna River as it flows through India’s capital city. Through the research, methodologies, and designs contained within this publication, this project aims to serve as a catalyst for the urgent recovery of the Yamuna River and its tributaries, building a publically accessible body of information and expertise resulting in visions of what an alternative future would be. Only by addressing human equality and the complexity of Delhi’s urban phenomenon can the social and ecological crises manifested through these neglected water bodies be solved.

Wild By Design Margie Ruddick, 2016-03-17 A look at how to bring the beauty and character of a natural environmental approach into more structured urban landscape designs, using five fundamental principles that can be applied and combined to create sustainable and emotionally powerful landscapes for public use.--Publisher.

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities.

The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

River Cities, City Rivers Thaisa Way, 2018-06-04 Cities have been built alongside rivers throughout history--shaping the development of urban landscapes and altering ecologies. Yet we have rarely given these urban landscapes their due. *River Cities, City Rivers* explores how such histories have shaped the present and how they might inform our visions of the future.

River Dynamics Bruce L. Rhoads, 2020-04-29 Rivers are important agents of change that shape the Earth's surface and evolve through time in response to fluctuations in climate and other environmental conditions. They are fundamental in landscape development, and essential for water supply, irrigation, and transportation. This book provides a comprehensive overview of the geomorphological processes that shape rivers and that produce change in the form of rivers. It explores how the dynamics of rivers are being affected by anthropogenic change, including climate change, dam construction, and modification of rivers for flood control and land drainage. It discusses how concern about environmental degradation of rivers has led to the emergence of management strategies to restore and naturalize these systems, and how river management techniques work best when coordinated with the natural dynamics of rivers. This textbook provides an excellent resource for students, researchers, and professionals in fluvial geomorphology, hydrology, river science, and environmental policy.

Retrofitting for Flood Resilience Edward Barsley, 2020-02-25 This book educates and introduce readers to the ways in which we can adapt to the threat of flooding throughout the built and natural environment. It offers advice on how to better understand the nature of flood risk, whilst highlighting the key approaches and principles necessary for developing community and property-level flood resilience. As a comprehensive and practical manual, this book includes richly illustrated diagrams on a variety of concepts and strategies to use when designing for flood resilience. It is vital resource for anyone looking to adapt to the threat of flood risk. Highly practical handbook for architects, students, engineers, urban planners and other built environment professionals Richly illustrated with practical examples and case studies Draws on research with the Cabinet Office, Environment Agency & Local Community as well as input from academic and industry experts, homeowners and residents of communities at risk of flooding.

Spatial Planning for a Sustainable Singapore Tai-Chee Wong, Belinda Yuen, Charles Goldblum, 2008-02-28 This book analyses and provides an insight to Singapore's planning system and practices associated with sustainable development. It takes a reflective approach in reviewing the direction, impact and significance of sustainable development in Singapore planning and the future challenges facing the city-state, which is often looked upon by many developing countries as a model.

Houses by the Shore Oscar Riera Ojeda, Byron Hawes, 2018-10-16 Highlighting thirty-five spectacular recently completed houses overlooking sea, lake, river, and ocean, selected for beauty and variety across the globe, *Houses by the Shore*

features homes that demonstrate the extraordinarily diverse ways that today's leading architects and interior designers build and design homes on the water and new approaches homeowners are taking to life on the shore. Frequently elegant and uncluttered, these houses serve as models of smart and often exquisite design with lots of ideas for homeowners who don't necessarily live in a waterfront home, but who wish to have something of that appeal and sensitivity in their own space. A range of projects encompassing myriad geographic and cultural inspirations show some of the world's most inviting residences, built in stone and glass, in wood and steel and concrete. The houses vary in size and style, though all within the realm of the modern, from open plan homes that include terraces and rooms that flow from indoors to out, to spaces flooded with light and views. Each house is photographed comprehensively with detailed interior and exterior pictures and plans, and placed into context through the lens of widely respected editor Oscar Riera Ojeda and descriptive texts written by design critic Byron Hawes, to give readers a privileged look at the best of shore-side residential architecture. With its beautiful modernist homes set beside the golden sands of the gulf coast of Mexico or upon the romantic islands of Greece, from Finland to South Africa to New Zealand, *Houses by the Shore* is a paean to rooms with a view.

Architecture Francis D. K. Ching, 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment.? Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.
